2. CHECK ALL PARTS

3. FIX GREENHOUSE TO FOUNDATION

4. BUILD FOUNDATION PARTS

5. BUILD ROOF STRUCTURE

6. ADD ROOF VENTS AND WINDOWS

7. LIFT ROOF ONTO FOUNDATION

8. FIT DOORS

11. VIEW YOUR FINAL PRODUCT!

BEFORE YOU START...

Arrange and Check parts

- Check the contents of the greenhouse packaging against the packing list and the required parts for your model in the Assembly Instructions Manual, which came with your Greenhouse.
- Do not begin assembly if any parts are missing.
- Please read these Assembly Instructions completely before assembly and keep them in your records so you can refer to them if you wish to add options or make repairs.
- The instructions in this manual lead you through each step in the assembly process. It is important for you to follow them closely.

Prepare the Site

- Your Greenhouse should be securely anchored to the prepared foundation or the Modular foundation (available as an option) using the recommended hardware. Follow instructions at the beginning of your manual.
- We recommend that you place your Greenhouse in a spot where it will receive direct sunlight and will be protected from the wind as much as possible. The door should not face prevailing winds.

A few tips

- The Greenhouse has been designed to be as easy to put together as it is beautiful to look at. A single person can do most of the work. Only attaching the roof requires the help of a family member or neighbour for a short while.
- Before you start assembly have the following available:
 - Measuring Tape
 - Level (Spirit Level)
 - Scissors
 - Gloves
 - Razor Knife
- When your Greenhouse is fully assembled examine it for sharp edges and trim with a razor knife if necessary.
- Close all roof vents in high winds.
- It is important to clear your Greenhouse of snow in the winter.
- You may find some parts easier to assemble if you first moisten them with soapy water.
