* The greenhouse is extended in modules measuring 770mm

ACCESSORIES

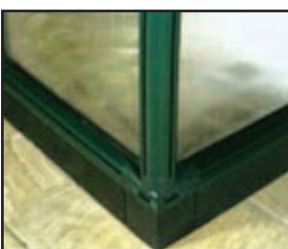

GHV: ROOF VENT
Colour : Green
For increased air ventilation and circulation. Can be added into each roof panel at any time
R595 each

GHL : LOUVRE WINDOW
Colour: Green
Replace panel in the back wall for additional cross ventilation
1 louvre can be added into all ECO units
R595 each

GHW : AUTOMATIC WINDOW OPENERS
Temperature activated by a thermally powered piston so no batteries or motors to fail. One opener required for each Rion roof vent.
R495 each

GHSC: SHADENET
A high quality aluminium & polyethylene mix. Reduce heat in summer. Conserve energy in winter. Fits directly over Rion greenhouse.
R695 to fit ECO33
R795 to fit ECO34 and ECO35

FOUNDATION KIT
A plastic foundation used on the perimeter of the greenhouse to ensure a stable and secure installation. Holes pre-drilled in the greenhouse frame allow for it be secured to a base. Our Rion Foundation Kit makes installation simple.

PVC SHELVING
Two tier stepped. Both sides 914mm high x 674mm wide
ECO33: 2130mm long **R3100***
ECO34: 2910mm long **R3850***
ECO35: 3670mm long **R4600***
