The greenhouse is extended in modules measuring 770mm

ACCESSORIES

GHV: ROOF VENT

Colour: Green
For increased air ventilation and circulation. Can be added into each roof panel at any time.
R595 each

GHL: LOUVRE WINDOW

Colour: Green
Replace panel in the black wall for additional cross ventilation - 1 louvre can be added into all ECO units.
R595 each

GHW: AUTOMATIC WINDOW OPENERS

Temperature activated by a thermally powered piston so no batteries or motors to fail.
One opener required for each Rion roof vent.
R495 each

GHSC: SHADENET

A high quality aluminium & polyethylenemix. Reduce heat in summer. Conserve energy in winter. Fits directly over Rion greenhouse.
R595 to fit ECO33
R795 to fit ECO34&ECO35

FOUNDATION KIT

A plastic foundation used on the perimeter of the greenhouse to ensure a stable and secure installation. Holes per-drilled in the greenhouse frame allow for it to be secured to a base. Our Rion Foundation Kit makes installation simple.

PVC SHELVING

Two tier stepped. Both sides. 914mm high x 674mm wide.
ECO33: 2130mm long **R3 100**
ECO34: 2910mm long **R3 850**
ECO35: 3670mm long **R4 600**
